

New Invader Program Application

It is the sole responsibility of the landowner to complete and submit this form for pre-approval, prior to commencing treatments.

The TNRD will cover **UP TO** 100% of the cost of invasive plant control, on listed new invaders, by a licensed contractor using herbicide. The amount (\$) covered may vary dependent upon the size and extent of the infestation and funding availability. The maximum amount the TNRD will cover is up to \$4,000. Exceptions to the maximum coverage may be considered under exceptional circumstances

Eligible new invader species are provided on page 2 of this application form. Plants NOT on this list must be pre-approved by the appropriate TNRD representative.

How to Apply:

1. Landowners must fill out the New Invader Application form and submit it, and a quote for treatment costs from the contractor, to the TNRD for pre-approval.
2. Once approved, landowners must make arrangements with a certified and licensed applicator, from the TNRD contractor list, to carry out herbicide treatment on the property listed.
3. Landowners are NOT required to pay for applicator services; the TNRD will directly pay certified applicators for their services upon receiving the following information from the certified applicator:
 - a. Applicators' invoice
 - b. Herbicide treatment day sheet
 - c. Map showing treatment area

Conditions:

- Only residents paying taxes to the TNRD qualify for this program.
- The TNRD may send a TNRD representative to the treated property to monitor pre and post treatment.
- Any applications received that have NOT received pre-approval by the TNRD will be denied.
- Applications will be accepted up to **October 15th** of the current calendar year. Any applications received after October 15th of the current year will not be considered until the following year.
- Payment to certified applicators is based on funding availability and the order the applications are received.

TNRD Disclaimers:

- The TNRD shall not be involved in laying out treatment areas, selecting the pesticide applicators & pesticide products, applying the herbicide, or other matters of operational nature. The landowner is solely responsible for all work done by the applicator.
- The TNRD DOES NOT authorize herbicide treatments; it is the sole responsibility of the landowner/lease holder to ensure any necessary approvals/consultations are obtained prior to treatment and that all relevant regulations are being followed.

Registered Landowner Name: _____

Mailing Address: _____

Parcel Identifier Number (PID) of treated property: _____

Landowner Phone: _____
(Work/Home): _____ (Cell): _____

Total land owned (hectares): _____

Estimated area of weed infestation proposed for treatment (hectares): _____

New Invader Species: _____

Certified Applicator Name: _____

Dated this _____ day of _____, 20____

Signature of Landowner/Occupier (In signing this you are agreeing to the terms & conditions of this application):

- By checking this box, the land owner acknowledges that the TNRD reserves the right to:
- a) Enter said lands for the purpose of inspecting work to verify its accuracy and completeness;
 - b) Enter site and treatment information into the provincial Invasive Alien Plant Program (IAPP) database. No personal information will be released.
 - c) Release your contact information to the Ministry of Forests, Lands, Natural Resource Operations and Rural Development for the purpose of requesting access to Crown Land adjacent to your property for invasive plant management activities.

New Invader Program- Eligible Plants

Common Name	Latin Name
Bighead knapweed	<i>Centaurea macrocephala</i>
Black knapweed	<i>Centaurea nigra</i>
Bohemian knotweed	<i>Fallopia x bohemica</i>
Brown Knapweed	<i>Centaurea jacea</i>
Bur Chervil	<i>Anthriscus caucalis</i>
Caraway	<i>Carum carvi</i>
Carpet burweed	<i>Soliva sessilis</i>
Common bugloss	<i>Anchusa officinalis</i>
Cypress Spurge	<i>Euphorbia cyparissias</i>
Field scabious	<i>Knautia arvensis</i>
Garden Yellow Loosestrife	<i>Lysimachia vulgaris</i>
Garlic Mustard	<i>Alliaria petiolata</i>
Giant Hogweed	<i>Heracleum mantegazzianum</i>
Giant knotweed	<i>Fallopia sachalinensis</i>
Giant Mannagrass/Reed Sweetgrass	<i>Glyceria maxima</i>
Green foxtail	<i>Setaria viridis</i>
Himalayan balsam	<i>Impatiens glandulifera</i>
Himalayan knotweed	<i>Polygonum polystachyum</i>
Japanese knotweed	<i>Fallopia japonica</i>
Longspine sandbur	<i>Cenchrus longispinus</i>
Marsh Plume Thistle	<i>Cirsium palustre</i>
Mountain bluet	<i>Centaurea montana</i>
Poison Hemlock	<i>Conium maculatum L</i>
Puncturevine	<i>Tribulus terrestris</i>
Queen Annes Lace	<i>Daucus carota</i>
Rush Skeletonweed	<i>Chondrilla juncea</i>
Saltmeadow Cordgrass	<i>Spartina patens</i>
Scotch broom	<i>Cytisus scoparius</i>
Scotch thistle	<i>Onopordum acanthium</i>
Smooth Cordgrass	<i>Spartina alterniflora</i>
Teasel	<i>Dipsacus fullonum</i>
Velvetleaf	<i>Abutilon theophrasti</i>
Whiplash hawkweed	<i>Hieracium flagellare</i>
Wild 4 O'clock	<i>Mirabilis nyctaginea</i>
Wild Chervil	<i>Anthriscus sylvestris</i>
Wild Oats	<i>Avena fatua</i>
Wild Parsnip	<i>Pastinaca sativa</i>
Yellow Nutsedge	<i>Cyperus esculentus</i>
